Case outcomes of conciliation procedures, by operator

Filing Year

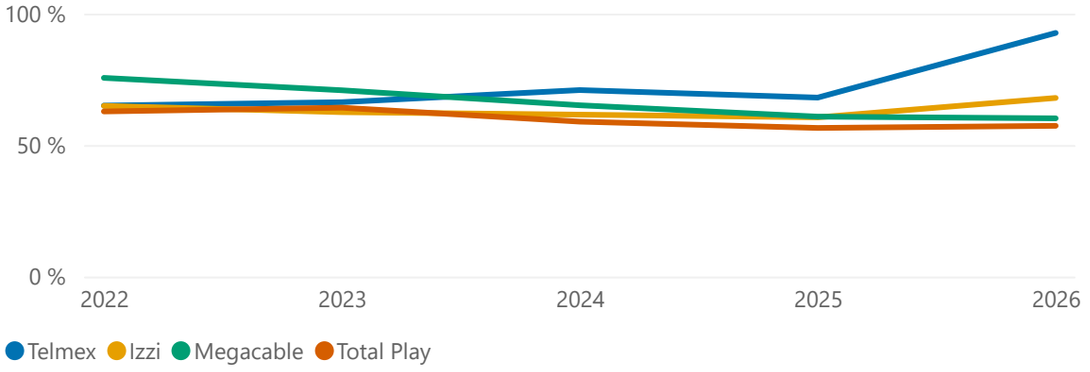

2022 | 2023 | 2024 | 2025 | 2026

All cohorts

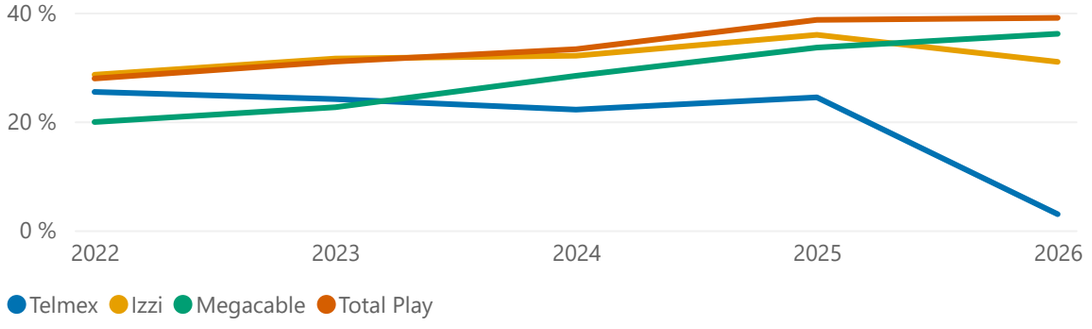

Outcome mix by operator

Conciliation rate by filing year

Withdrawal share by filing year

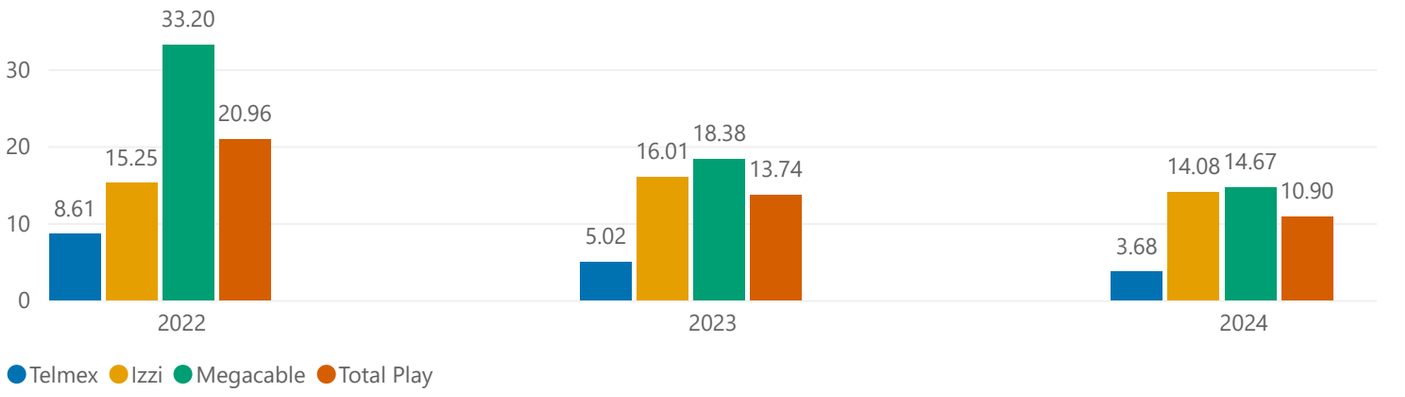

Conciliation rate = conciliated cases / (conciliated + not conciliated + withdrawn + dismissed).
Withdrawal share = withdrawn cases / the same base.
2025 is an incomplete tail and 2026 a partial year (D15).

Points for 2025 and 2026 rest on fewer closed cases.

Sources: PROFECO, "Quejas en materia de telecomunicaciones", datos.gob.mx, CC BY 4.0, downloaded 2026-10-24 (cleaned and aggregated by the author). CRT, Banco de Información de Telecomunicaciones (BIT), "TD_ACC_BAF_ITE_VA", downloaded 2026-10-26. Independent portfolio project; not an official product and not endorsed by PROFECO, the CRT or the Government of México.

Complaints per 100,000 fixed broadband accesses, 2022 to 2024

Rate = complaints filed in the year about fixed broadband brands of the operator / the operator's fixed broadband accesses in December of that year x 100,000.

National level only: the state is the PROFECO office, not the consumer's location (D8).

BIT accesses end in December 2024 (D14).

operator_name	year_num	Complaints	Accesses December	Complaints per 100k Accesses
Telmex	2022	863	10,025,387	8.61
Telmex	2023	527	10,488,966	5.02
Telmex	2024	413	11,208,977	3.68
Izzi	2022	910	5,966,299	15.25
Izzi	2023	906	5,658,715	16.01
Izzi	2024	791	5,619,403	14.08
Megacable	2022	1,376	4,144,809	33.20
Megacable	2023	856	4,656,004	18.38
Megacable	2024	780	5,316,545	14.67
Total Play	2022	931	4,442,665	20.96
Total Play	2023	656	4,775,774	13.74
Total Play	2024	579	5,313,779	10.90

Complaint types and PROFECO offices

2022 | 2023 | 2024 | 2025 | 2026

Telmex | Izzi | Megacable | Total Play | Other

Central Office Share

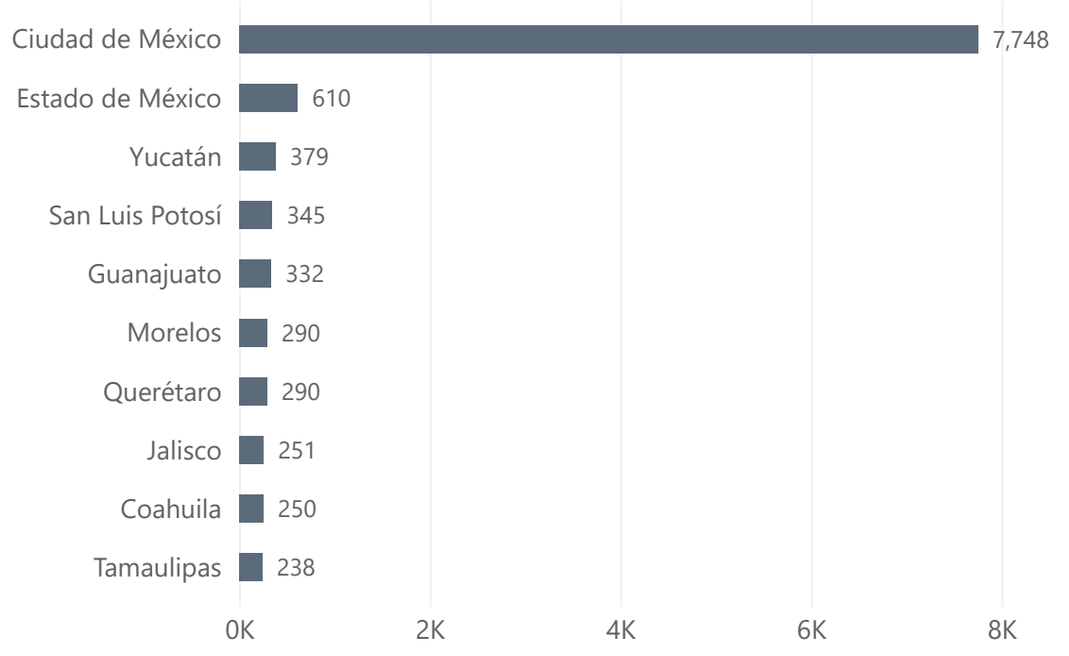

49.6 %

The state is the PROFECO office that handled the case, not where the consumer lives. 54.9% of all complaints (49.6% of the fixed broadband cases) are handled by the central office, and 62% are filed in Ciudad de México (D8). For this reason there is no map and no rate by state.

Top 10 complaint types

Top 10 states (PROFECO office state)

Data quality and limits

Missing Close Date	Close Before Filing	Cancelled	Batch Closing Day	BIT Rows No Value	BIT Exact Copies
66	3	48	147	1,831	325

Each card counts the records affected by one data quality rule. The treatment of each rule is documented in the project decisions (docs/decisions.md); none of these records changes the conclusions of the previous pages.

Limits of this analysis

- Only closed cases are in the PROFECO file, so the most recent filing months are incomplete. Trends use the filing-year cohort: 2022–2024 are complete, 2025 is an incomplete tail and 2026 is partial.
- Resolution time covers 12,833 cases: fixed broadband brands, the 4 main operators, the Conciliation group and a valid duration.
- Accesses (CRT BIT) are a December stock. The complaints rate is national and only for 2022–2024.
- State is the PROFECO office that handled the case, not where the consumer lives; the central office handles 54.9% of all cases.
- The BIT source has no explicit license. This is an independent portfolio project, not an official product.
- Results describe associations in the data, not causes.
